

Planning for The Cost of Care

Evaluations

A typical evaluation lasts **up to 1 hour**. For someone with insurance, the typical codes/charges would be (1EV, 1TE, 1 TA) at a cost of \$195. This would be the case for someone with one issue or one region (Ex. - neck and shoulder or arm pain; OR back and hip, knee, or leg pain).

****If self-pay/cash then apply 20% self-pay/cash discount = \$155.**

We realize that a number of issues can start adding up, keeping you from doing what you love. In the cases of greater complexity (including - multiple regions, longer history of issues, or duration of symptoms, and for second opinions) additional evaluation time will be allotted, **up to 1 hour and 20 minutes**. For someone with insurance the typical codes/charges would be (1EV, 1TE, 2TA) at a cost of \$240.

****If self-pay/cash then apply 20% self-pay/cash discount = \$190.**

Follow-up appointments

The majority of cases will need a number of follow-up visits, typically 4-10 depending on the condition being treated. (Post-surgery therapy varies widely in terms of number of follow-up visits; often for major surgeries most will exceed the 10 visits given as an example in this section.) All follow-ups are a minimum of 40 minutes and can be up to an hour as needs dictate. For someone with insurance the typical codes/charges for a 40-minute session would be (1TA, 2 TE) at a cost of \$125. **The rates for self-pay/cash are discounted as follows up to 40 min = \$80; up to 50 min =\$100; up to 1 hour =\$120.** Assuming booking 40-minute follow-ups (for an episode of care with 4-10 visits) this translates into a cost range of \$320 to \$800. **Please note that this cost is in addition to the cost of the required initial evaluation.** This results in a very low cost of care as compared with imaging, surgery, injections, or months of spinal manipulative care.

Additional considerations

Self-pay/cash discounts are only applied when no insurance is used.

Methods of payment can vary and include cash, check, personal credit cards, use of a healthcare savings account (HSA), or healthcare flexible spending account (FSA).

Payment is expected at the time of service. For your convenience payment plans for a mutually agreed upon amount can be set up at the time of service with the card on file system Easy Pay which is used for all credit card payment processing.
